

# Santyl Dressing Changes

---

1. When you shower use **one towel** to dry your body, and **a different towel** to dry your wound area.
2. Apply Santyl the **thickness of a nickel** directly to your wound
3. Apply a saline moistened gauze on/inside the wound
  - a. **This is an important step - the moistened gauze activates the Santyl!**
4. Apply **dry gauze** over the moistened gauze
5. Secure with tape - recommend **paper tape** as it is easier on sensitive skin

**Call with questions - (561) 333-1335**
