

The Team at Polo

Greetings!

We're excited to introduce the very first edition of our Advanced Surgical Physicians Newsletter! Whether you're a new patient or someone who's been with us for years, we created this space just for you—to keep you informed, supported, and connected.

Each month, we'll be sharing helpful health tips, practice updates, behind-the-scenes insights, and answers to some of the most common questions we hear from our patients. Think of it as a way to stay in the loop and feel more at ease on your health journey with us.

Our goal? To go beyond the exam room and give you easy-to-understand, relevant information—while making you feel like part of the family.

Thanks for being here with us. We're so glad you're part of our community.

5,000 Surgeries, One Powerful Robot

Wellington Regional Medical Center recently hit an exciting milestone—5,000 robotic surgeries completed! The 5,000th case was performed by our very own Dr. Kyle Eldredge using the da Vinci® Surgical System. At Advanced Surgical Physicians, we proudly use the most up-to-date minimally invasive techniques to give our patients safer surgeries and faster recoveries. From laparoscopic procedures to state-of-the-art robotic surgery, our team is committed to precision, smaller incisions, less pain, quicker recovery times, and better outcomes every step of the way.

1 medications are reshaping the landscape of surgical care, cancer recovery, and long-term weight management.

Obesity not only complicates surgical outcomes but also impacts cancer prognosis and recovery—particularly for breast cancer patients. That's why the practice integrates GLP-1 therapies to support safe, sustainable weight loss before or after surgery.

For breast cancer survivors dealing with joint pain or weight fluctuations from medication, GLP-1s can offer real support—with no known contraindications once active chemotherapy ends.
