GLP-1 vs Surgery What's Right for You?

Weight loss medications like GLP-1s are everywhere right now, but are they the best option for everyone?

Here's the truth: medications and surgery are not competing, they serve different patients and goals.

GLP-1 medications may be helpful if:

- You're looking for gradual weight loss
- You prefer a non-surgical option
- You meet specific medical criteria

Bariatric surgery may be the better option if:

- You need significant, long-term weight loss
- You have obesity-related health conditions
- You're looking for a more durable, long-term solution

We don't believe in one-size-fits-all care. Every patient is different, and the right approach depends on your health history, goals, and what will be most effective for you long term.

Our role is to help guide you through your options so you can make a safe, informed, and confident decision.

We're here to help.

The Future of Surgery

Advanced robotic surgery = less pain, faster healing, and better results

With the arrival of the Da Vinci 5 at Wellington Regional Medical Center, patients in our community now have access to the latest in robotic-assisted technology for most of the procedures our doctors perform: Hernia Repair, Bariatric Surgery, Colorectal Surgery, Gallbladder Removal and more.

We're proud to bring advanced surgical innovation because our patients deserve the very best. **VIDEO TO LEFT**

We are grateful to be part of something bigger than medicine.

This is what community looks like.....

Our 2nd Annual "Obstacle Course" was a huge success, raising **\$6000** in support of **Sojourners with Healing Hearts**, an organization that walks alongside individuals facing breast cancer with compassion and strength as well as providing screenings to those at risk of not accessing care. We believe healing doesn't stop after surgery. It continues through support, connection, and showing up for one another. **Thank you to our community partners: Wellington Regional Medical Center, AMB Performance Group, Florida Cancer Specialists, Dr. Kishore Dass, Dr. Marilyn Raymond, Stryker Medical, Iconic Event Experiences, and Khanna House Studios for their generous sponsorships. In addition, thank you to all of you that ran and created teams. Without each of you, this special event would not have been possible. Our next event is in the planning phase for March 2027. More Details to Come!**

STAFF Spotlight

We're excited to introduce one of the newest members of the Advanced Surgical Physicians team, Sara!

Sara recently joined our billing department after relocating from Tampa, and she has already made such a positive impact. She is fluent in Spanish, helping us better connect with and support our diverse patient community.

What makes Sara especially unique is the range of skills she brings to the team. In addition to her role in billing, she also assists with procedures using her ultrasound experience, adding even more value to patient care. She has been learning

quickly, jumping in wherever needed, and truly embracing every aspect of what we do here at ASP.

Her patient-first mindset, strong work ethic, and eagerness to learn have made her a perfect fit for our team and we're so happy to have her as part of the ASP family.

Fun fact: Sara loves playing games

March is Colorectal Cancer Awareness Month

We're proud to have Dr. Kyle Eldredge, DO representing Advanced Surgical Physicians at Wellington International, sharing important insights on colorectal cancer.

We strongly encourage routine screening because early detection saves lives. But if something doesn't go as planned, our team is here for you every step of the way. We provide expert minimally invasive techniques with compassionate care.

If you're due for screening, don't wait to see your gastroenterologist. If you need a colorectal consultation we are here for you.

Tirzepatide is changing the way we approach weight loss. Find out if it's right for you. You don't have to do this alone, our team will guide you every step of the way. We can now offer **SURGICAL** options too with Dr.

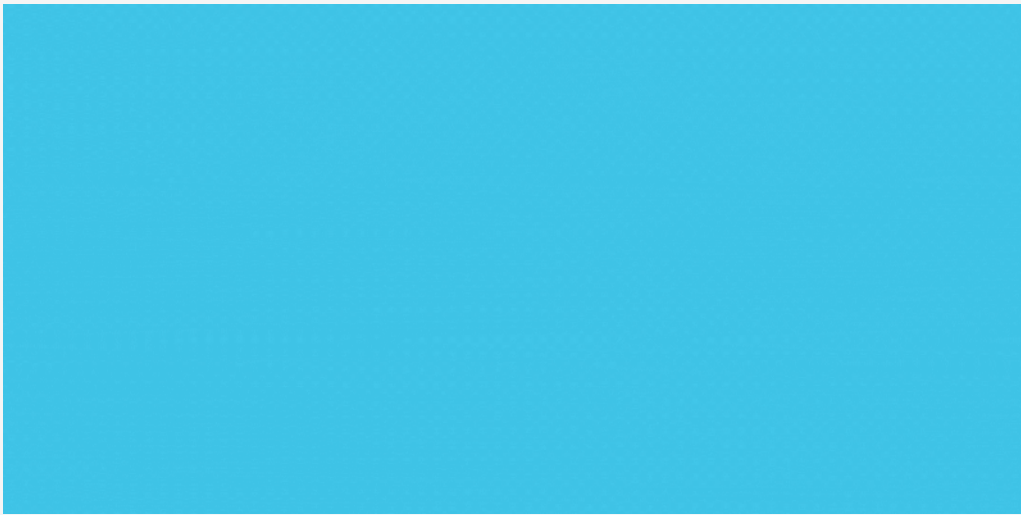

Shockley!

Completely Personalized and Affordable
